DIFFERENTIATORS

•Product

- E-commerce intellectual property that is:
1. "Cradle to grave" universal / transportable complete medical record;
 2. Fraud control / misdiagnosis/incorrect medication- dispensing IT tool;
 3. Payment mechanism compatible.

•Track Record

1. Beginning in 2007, Dr. Kenneth Lill (now Managing Member of Kearney Enterprises LLC) and his team proved the team's system's success with over 1,000 patients in a trial at a major clinic.
2. Testimonial and video link are available.

•Advantages

1. Eliminating Delays:

Kearney's system can provide the system's buyer a 2-year "lead" – reasons are clear from testimonial and video link.

2. History:

Kearney's system has been functional for over a decade.

3. Clinical trial:

Testimonial from Chairman of the Pharmacy Department of the University of Buffalo (New York).

4. Kearney's system can help to fulfill Indian government requirements for universal medical ID / data, payment card

When a card holder using Kearney's system checks into a hospital and visits different departments, the patient does not need to fill out forms again -- the hospital already has all needed information, thanks to the medical data card using Kearney's system.

5. Instant interoperability / accessibility in 193 countries

Kearney provides 100% Electronic Health Record interoperability via CCR (Continuity of Care Record – universal default language legally accepted in 193 countries).

Note that India is a member of an 8-nation healthcare consortium that seeks to standardize healthcare arrangements.

Result: Electronic Health Records must be compatible with CCR (Continuity of Care Record).

Kearney's system is written in native CCR, so Kearney's system can "talk" to any legally authorized system anywhere in the world except North Korea.

6. Audit Trails unique in the field at this time / Complete data

- a. Cradle to Grave Medical Records availability – with Access Controls
- b. Fraud Controls.
- c. Contraindication Controls.
- d. Kearney's system can enable an Indian patient's care provider to send "Warning Notifications" to relevant Governmental entities, hospitals, pharmacies, insurance firms, banking institutions, etc. if a physician's prescription information is not matching profiles for a patient or if a patient has a track record of doctor / hospital shopping.
- e. The same principle applies with regard to medication dispensing within a hospital.

Kearney provides lists of all physicians, nurse practitioners, nurses, administrators, etc. in India and 7 other nations affiliated with India in a common arrangement regarding healthcare, and Kearney can (if desired) provide the same for the USA, Canada, the European Union (and associated countries), Australia, New Zealand, and China.

7. Saving time and work for Physicians, Nurses, EMT's, Hospital Administrators, etc.

- a. No item is more than 2 clicks away.
- b. Almost all other systems have many drop-downs, impairing efficiency.

8. Preventing an Equifax Disaster

Kearney's system has been designed specifically to prevent disasters such as Equifax.

9. Can any physician, hospital, etc read Kearney's Card?

Yes, in any of 193 countries, but only specific items permitted via authorization can be read.

Examples:

- a. Physicians won't be able to read financial data;
- b. Persons who are not healthcare professionals won't be able to read medical data.

Additionally, different levels of healthcare professionals have varying degrees of access
